Enterprise Cyber Risk Simulation Report

Simulation Profile

Company Name:	Demo Corp
Industry:	Healthcare
Annual Revenue:	\$5,000,000.00
Employee Count:	100
Critical Asset:	Customer PII
Targeted Attack:	Phishing
Prepared For:	CEO

Risk & Financial Impact

Cyber Readiness:	★★■■■
Risk Score (0-100):	65 (Lower is better)
Estimated Financial Loss:	\$164,062.50 - \$328,125.00

Attack Story Timeline

Day 1: Initial Email Delivery

An employee receives a highly targeted spear-phishing email impersonating the IT department.

Day 3: Credential Theft

The employee clicks the malicious link and enters their credentials into a fake login portal.

Day 5: Account Takeover

The attacker successfully logs into the corporate network using the stolen credentials.

Day 7: Data Exfiltration

Sensitive internal communications and customer records are forwarded to an external server.
